## **Getting Started**

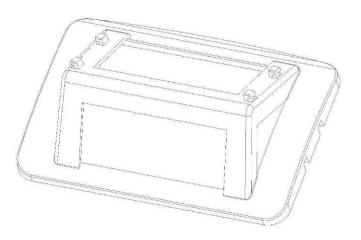

## **Packing List**

The package contains the following parts, please check if all the items are not missed:

1. The phone device

2. The footstand

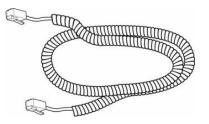

3. Handset

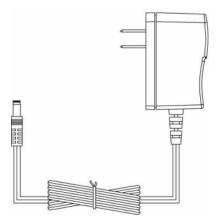

4. Headset cord

5. Power adapter

6. Ethernet cable

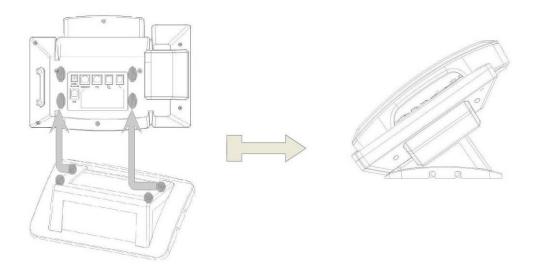

7. Quick installation reference

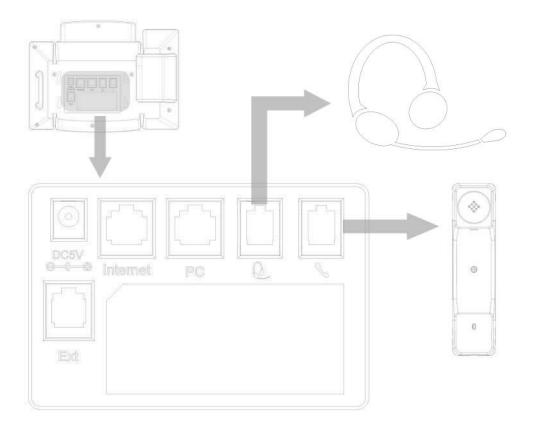

## **Phone Installation**

## 1. Attach the Foot stand

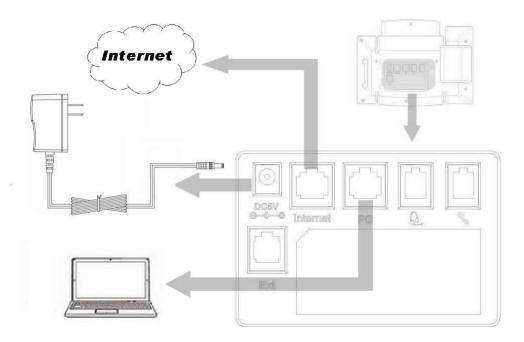

## 2. Connect the Handset and optional Headset

## 3. Connect the Network and Power

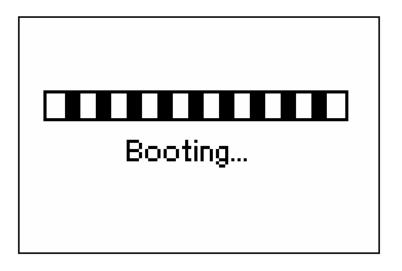

## Initialization

After your phone has been powered up, the system boots up and performs the following steps:

Automatic Phone Initialization

The phone finishes the initialization process by loading the saved configuration. The phone LCD screen will display "Booting"

And then show "Initializing "during the initialization.

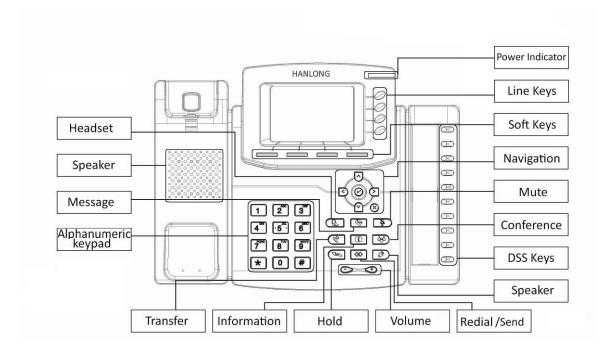

By default the phone attempts to contact a DHCP server in your network in order to obtain its valid network settings, e.g. IP address, subnet mask, default gateway, DNS server.

#### Note:

The PC and phone should be in the same segment.

When register the accounts in web and the server port is not "5060", then "SIP Server" should be set as "SIP Server's IP address: server port.", for example, "192.168.0.122: 5090".

## **Administrator Password**

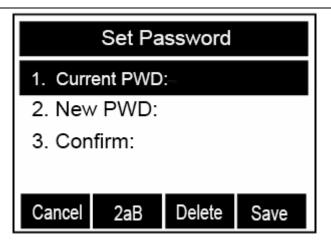

The password is mainly used for login the web interface or set the advanced settings through phone interface. And the default password of the administrator is: **admin** 

#### To change to password via Phone Interface

- Press Menu → setting → Advanced settings → password (default admin) → Phone Setting → Set Password
- 2. Enter the current PWD (password), new password and confirm the new password.

3. Press save soft key or to save the new password.

#### To change to password via Web Interface

- 1. Management  $\rightarrow$  Password
- 2. Fill the value
- 3. Click SaveSet to save the configuration.

| Password       | User Type        | Admin |                 | NOTE  |

- 1. Press () or transfer soft key during the conversation, the call is on hold now.
- 2. Enter the number transfer to, and then press (1), then you can here the ring tone.
- 3. Press () or the Tran soft key, and now the Semi-attended transfer completed.

**NOTE:** To use this function, should at least one line key set as Auto.

#### **BLF** Transfer

- 1. Set a Programmable Key or line key is set as BLF. For how to set BLF, please refer to <u>BLF</u>
- 2. Press () or transfer soft key during the conversation, the call is on hold now.
- 3. Press BLF key then realize blind, attended and Semi-Attended Transfer.

### **Call Conference**

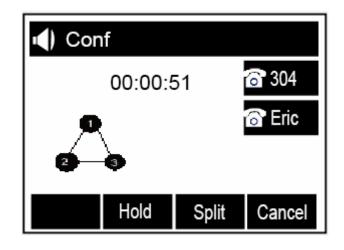

This IP Phone supports up to 5-way conference.

#### **5-way conference**

- 1. Assuming that call party A and B are in conversation. A wants to bring C, D and E in a conference
- 2. A press line 2 key, the call is placed on hold.
- 3. A enter the number of C and then press send soft key or  $\begin{bmatrix} \frac{2\pi i}{2\pi i} \end{bmatrix}$ .
- 4. C answering the call.
- 5. A press (and now this is **3-way conference**) or the conference soft key, then A, B and C are now in a conference.
- 6. A press line 3 key, the current 3-way conference is placed on hold.
- 7. A enter the number of D and then press send soft key or  $\boxed{\frac{425}{12}}$ .
- 8. D answering the call.
- 9. A press or the conference soft key, then A, B, C and D are now in a conference.(and now this is **4-way conference**)
- 10. A press line 4 key, the call is placed on hold.
- 11. A enter the number of E and then press send soft key or  $\square$ .
- 12. E answering the call.

- 13. A press (a) or the conference soft key, then A, B, C, D and E are now the **5-way conference** is built.
- 14. A end the call, the conference is finished.

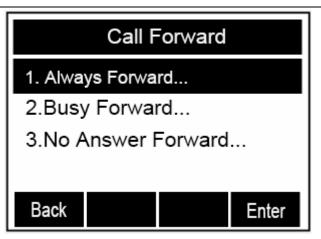

#### Note:

- 1. If C does not answer the call, A can back to continue the conversation with B;
- 2. Once A hangs up the call, the conference is ended, while if B or C drops the call, A&C or A&B conversation continues.
- 3. The conference feature is not available on all servers. For more information, contact your system administrator.
- 4. To realize the 5 way conference, the line should be all available.
- 5. Press to get all parties information.

### **Call Forward**

This phone supports static forward (always forward, busy forward and no answer forward) and dynamic forward

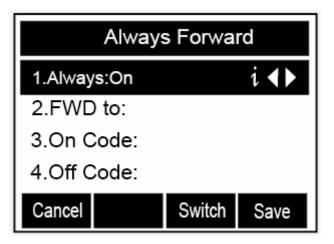

#### To configure static forward

#### To configure always forward

With this feature, all incoming calls will forward immediately to configured number.

- 1. Press Menu  $\rightarrow$  Features  $\rightarrow$  Call forward  $\rightarrow$  Always Forward.
- 2. Press > and < or press  $\boxed{1}$  to select the enable choice
- 3. Enter the forward to number and on code (optional), off code (optional).
- 4. Press or Save soft key to save the configuration.

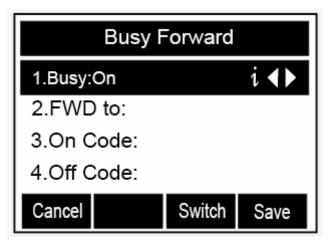

#### To configure busy forward

With this feature, the incoming calls are immediately forwarded if the phone is busy.

- 1. Press Menu  $\rightarrow$  Features  $\rightarrow$  Call forward  $\rightarrow$  Busy forward.
- 2. Press > and < or press 1 to select the enable choice.
- 3. Enter the forward to number and on code (optional), off code (optional).
- 4. Press Or Save soft key to save the configuration.

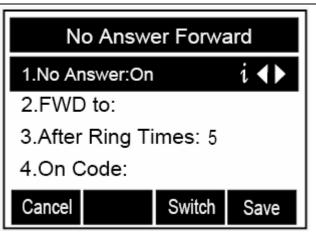

#### To configure no answer forward

No Answer Forward: Incoming calls are forwarded if not answered after some time.

- 1. Press Menu  $\rightarrow$  Features  $\rightarrow$  Call forward  $\rightarrow$  No answer forward.
- 2. Press  $\bigcirc$  and  $\bigcirc$  or press  $\bigcirc$  to select the enable choice
- 3. Enter the forward to number and on code (optional), off code (optional).
- 4. Press Or Save soft key to save the configuration.

When the Forward feature is enabled, the Forward Icon will display on Top of the LCD.

#### Note:

This feature is not available on all servers. For more information, contact your system administrator.

### **Speed Dial**

With this feature, you can dial one directory by press the definite key.

#### To configure Speed Dial feature via phone interface

- Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1(for example)
- 2. Press > and < or press  $\qquad$  key to select the Speed Dial in the type field.
- 3. Enter the targeted Number.
- 4. Press () or Save soft key to save the configuration

Then the selected Line or Memory key will work as Speed Dial.

#### To configure Speed Dial feature via Web Interface

- 1. Click Function keys  $\rightarrow$  Line or Memory key.
- 2. Select the wanted Line or Memory key and set as Speed Dial.
- 3. Enter the desired phone number in the Value field.
- 4. Select the Account ID
- 5. Click the SaveSet to save the configuration.

### **Direct Pickup**

With this feature, you can pick up the set line when it ringing.

#### To configure Direct Pickup feature via phone interface

 Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1(for example)

- 2. Press  $\bigcirc$  and  $\bigcirc$  or press  $\bigcirc$  key to select the Speed Dial in the type field.
- 3. Enter the value.
- 4. Press or Save soft key to save the configuration

Then the selected Line or Memory key will work as Direct Pickup.

#### To configure Direct Pickup feature via Web Interface

- 1. Click Function keys  $\rightarrow$  Line or Memory key.
- 2. Select the wanted Line or Memory key and set as Direct Pickup.
- 3. Enter the pickup code and followed the desired phone number in the Value field.
- 4. Select the Account ID
- 5. Click the SaveSet to save the configuration.

### **Group Pickup**

With this feature, you can pick up the specified group that you want incoming calls.

#### To configure the Pick up via phone interface

- Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1(for example)
- 2. Select the wanted Line or Memory key.
- 3. Press > and < or press  $\qquad \square$  key to select the Group Pickup in the type field.
- 4. Enter pickup code and followed the desired group number
- 5. Press or Save soft key to save the configuration

#### To configure the Group Pick up via Web interface

- 1. Click Function keys  $\rightarrow$  Line or Memory key.
- 2. Select the desired Line or Memory key and select Group Pickup in the Type.
- 3. Enter the pickup code and followed the desired Group number in the Value field.
- 4. Click the SaveSet to save the configuration.

### BLF

You can use the BLF (Busy Lamp Field) feature to monitor a specific one whether his phone is busy or free.

- 1. When the monitored line is idle, the light is steady green.
- 2. When the monitored line is ringing, the light is blinking red, press the BLF key to pick the phone up directly.
- 3. When the monitored line is calling or in a conversation, the light is steady red.

#### To configure a BLF key by phone

- 1. Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1(for example).
- 2. Select the targeted Line or Memory key.
- 3. Press > and < or press  $\boxed{1}$  key to select the BLF in the type field.
- 4. Enter the targeted Value Number.
- 5. Press > and < or press 1 key to select the Account ID.
- 6. Enter the Pickup Code.
- 7. Press or Save soft key to save the configuration

#### To configure a BLF key by web

1. Click Function keys  $\rightarrow$  Line or Memory key.

- 2. Select the desired Line or Memory key and select BLF in the Type.
- 3. Enter the monitored phone number in the Value field.
- 4. Select the Account ID
- 5. Filled the Pickup code.
- 6. Click the SaveSet to save the configuration and then restart.

#### Note:

This feature is not available on all servers. For more information, contact your system administrator.

### Record

With record feature, you can record calls by pressing a record key on the phone.

#### To configure the record via phone interface

- 1. Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1(for example)
- 2. Select the wanted Line or Memory key.
- 3. Press (>) and (<) or press (a) key to select the Key Event in the type field.
- 4. Press (>) and (<) or press (1) key to select the Record.
- 5. Press or Save soft key to save the configuration

#### To configure the record via Web Interface

- 1. Click Function keys  $\rightarrow$  Line or Memory key.
- 2. Select the desired Line or Memory key and select Record in the Type.
- 3. Click the SaveSet to save the configuration.

#### Note:

Please contact the system administrator whether support this feature or not.

### Call Park

With this feature, you can put a call on hold and continue the conversation from another phone.

#### To configure the Call Park via phone interface

1. Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1(for example)

- 2. Select the wanted Line or Memory key.
- 3. Press > and |< or press Switch soft key to select the Key Event in the type field.
- 4. Press > and < or press Switch soft key to select the Call Park.
- 5. Press Or Save soft key to save the configuration

#### To configure the Call Park via Web interface

- 1. Click Function key  $\rightarrow$  Line or Memory key.
- 2. Select the desired Line or Memory key and select Direct Pickup in the Type.
- 3. Click the SaveSet to save the configuration.

### Paging

With this feature, you can call a phone directly.

#### To configure the paging via phone interface

- Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1(for example)
- 2. Select the wanted Line or Memory key.
- 3. Press and or press key to select the Key Event in the type field.
- 4. Press  $\bigcirc$  and  $\checkmark$  or press  $\bigcirc$  key to select the Paging.
- 5. Press or Save soft key to save the configuration

#### To configure the Paging via Web interface

- 1. Click Function keys  $\rightarrow$  Line or Memory key.
- 2. Select the desired Line or Memory key and select Paging in the Type.

3. Click the SaveSet to save the configuration.

### DTMF

#### To configure the DTMF via Phone Interface

- 1. Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1(for example)
- 2. Select the wanted Line or Memory key.
- 3. Press > and < or press  $\qquad \square$  key to select the DTMF in the type field.
- 4. Enter the value
- 5. Press () or Save soft key to save the configuration

#### To configure the DTMF via Web interface

- 1. Click Function keys  $\rightarrow$  Line or Memory key.
- 2. Select the desired Line or Memory key and select DTMF in the Type.
- 3. Fill the value.
- 4. Click the SaveSet to save the configuration.

### Prefix

#### To configure the Prefix via Phone Interface

- 1. Press Menu → Features → Function Keys → Line or Memory keys as Function Keys → Memory key1(for example)
- 2. Select the wanted Line or Memory key.

- 3. Press > and < or press  $\square$  key to select the Prefix in the type field.
- 4. Enter the value
- 5. Press or Save soft key to save the configuration

#### To configure the Prefix via Web interface

- 1. Click Function key  $\rightarrow$  Line or Memory key.
- 2. Select the desired Line or Memory key and select Prefix in the Type.
- 3. Fill the value.
- 4. Click the SaveSet to save the configuration.

Then when you press this key, the set value is input directly.

# Upgrade

### **Factory Reset**

#### To set Factory Reset by phone interface

- 1. Press Menu → Setting → Advanced Setting( default password: admin)→ Factory Reset
- 2. Press OK soft key in the warning page.

### Upgrade

To upgrade software, this phone can be configured with a TFTP server where the new code image is located. The TFTP upgrade can work in either static IP or DHCP mode using private or public IP address. It is recommended to set the TFTP server address in either a public IP address or on the same LAN with the phone.

#### To configure the TFTP server via the Web configuration interface

Input the admin password to enter the configuration screen. From there, enter the TFTP server address in the designated field towards the bottom of the configuration screen.

Once the TFTP server is configured, please power cycle the phone.

TFTP process may take as long as 1 to 2 minutes over the Internet or just 20+ seconds if it is performed on a LAN. Users are recommended to conduct TFTP upgrade in a controlled LAN environment if possible. For those who do not have a local TFTP server, Hanlong provides a NAT-friendly TFTP server on the public Internet for firmware upgrade. Please check the Service section of Hanlong's Web site to obtain this TFTP server's IP address.

#### Directory to configure local TFTP

- 1. Unzip the file and put all of them under the root directory of the TFTP server.
- 2. The PC running the TFTP server and the UC IP PHONE should be in the same LAN segment.
- 3. Go to File -> Configure -> Security to change the TFTP server's default setting from "Receive Only" to "Transmit Only" for the firmware upgrade.
- 4. Start the TFTP server, in the UC IP PHONE's web configuration page.
- 5. Configure the Firmware Server Path with the IP address of the PC.
- 6. Update the change and reboot the unit.

#### NOTES:

When Hanlong IP Phone boot up, it will send TFTP or HTTP request to download configuration files, there are two configuration files, one is "cfg.txt" and the other is "cfg001fc1xxxxx", where "001fc1xxxxx" is the MAC address of the phone. These two files are for initial automatically provisioning purpose only, for normal TFTP or HTTP firmware upgrade, the following error messages in a TFTP or HTTP server log can be ignored.

Download and install a free TFTP or HTTP server to the LAN to perform firmware upgrades. A free Windows version TFTP server is available: http://www.solarwinds.com/products/freetools/free\_tftp\_server.aspx.

#### To upgrade manually via the Web configuration interface

Download the firmware.

Click Management  $\rightarrow$  Upgrade

Click Brower or the blank.

Select the firmware and then click

Upgrade

L

Restart.

# **Troubleshooting**

### Why is the phone LCD screen blank?

- 1. Ensure your phone is properly plugged into a functional AC outlet.
- 2. Ensure that the phone isn't plugged into a plug controlled by a switch that is off.
- 3. If the phone is plugged into a power strip, try plugging it directly into a wall outlet instead.
- 4. If your phone is powered from PoE, ensure you use a PoE compliant switch or hub, or contact your system administrator for more information.
- 5. Check that the power LED is on to ensure the phone is powered on.

### Why does the phone display "Network Unavailable"?

- Ensure that the Ethernet cable is plugged into the Internet port on the phone and the Ethernet cable is not loose.
- Ensure that the switch or hub in your network is operational.
- Contact your system administrator for more information.

### Why can't I get a dial tone?

- Check for any loose connections and that the phone has been installed properly. For the Installation instructions, refer to <u>Phone Installation</u>.
- Check whether dial tone is present on one of the audio modes.
- Switch between the Handset, Headset (if present) or Hands-Free Speakerphone to check whether dial tone is present for one of the audio modes.
- If the dial tone exists on another audio mode, connect a different handset or headset to isolate the problem.
